

# Destiny Of Light

Axehammer

It moves in behind you  
Too slow it will find you  
The stars in the sky  
You sit and wonder why

With time it's forsaken  
Your memory awakens  
Bright light in your eyes  
Running through the night

Darkness is upon you  
It moves in to shake you  
Streaks in the night  
It's the destiny of light

Shadows they move with you  
They try to confuse you  
Moving through the madness  
Step into the light

You know it may blind you  
Don't let it forsake you  
Moving with the shadows  
To the destiny of light

It's energy drains you  
In life it will strain you  
Step into the darkness  
See the destiny of light

Time is in the distance  
You know it's persistence  
To take you away  
Your life is up tonight

It's energy drains you  
In life it will strain you  
Step into the darkness  
See the destiny of light

It moves in behind you  
Too slow it will find you  
The stars in the sky  
You sit and wonder why

With time it's forsaken  
Your memory awakens  
Bright light in your eyes  
Running through the night

Darkness is upon you  
It moves in to shake you  
Streaks in the night  
It's the destiny of light
