You were born on judgement day
But you don't care and go your own way
Your living your life and you made your own laws
Fellowship forever, your freeing your souls

Riding with the brothers Through the wind and the rain You're proud of your color And can feel no pain

Forever angel Keep on riding and fight for your rights Forever angel Roaring thunder through endless nights Endless nights

Sometimes it seems that you're dancing with the devil And you recognize that the price for freedom is high The brotherhood in your life is your highest call You're the chosen ones, all for one and for all

Riding with the brothers Through the wind and the rain You're proud of your color And can feel no pain

Feel no pain

Forever angel Keep on riding and fight for your rights Forever angel Roaring thunder through endless nights

Riding with the brothers
Through the wind and the rain
You're proud of your color
And can feel no pain
(clean) Em (solo)
I can feel no pain

Forever angel Keep on riding and fight for your rights Forever angel Roaring thunder through endless nights

Forever angel (forever)
Keep on riding and fight for your rights
Forever angel (forever angel)
Roaring thunder through endless nights
