

# She's Got Nine Lives

Axxis

I got na na na na - nine lifes

She's got na na na na - nine lifes to survive

No one knows what you think  
You paint your hair blue - now it's pink  
Live - live - living your own way

She's a punk - debunk her parent's life  
Intense - the sense of causing strife  
In her mind sometimes she's like a child

Daddy's eyes still watching me  
But I set me free

She's got na na na na - nine lifes to survive  
She got na na na na nothing left to lose

She got a bad - sad - history  
A really sick life wrapped in mystery  
She rearranged - changed everything  
From a saint to a sinner with a nose-ring

She felt lost - crossed - different ways  
Without getting involved with the old cliches  
Cat-like she moves through her life

Daddy's eyes still watching me  
But I set me free

She's got na na na na - nine lifes to survive  
She got na na na na nothing left to lose  
In her paradise

Footloose - footloose - footloose

Daddy's girl is breaking free  
Time to change the world for me  
Life is turning upside down  
She one of your kind

She's got na na na na - nine lifes to survive  
She got na na na na nothing left to lose  
In her paradise
