

# Planet Y Is Alive!

Ayreon

How can we still trust you after all the vows you broke?  
Tell me why should we believe in you after all the lies you spoke?

You swore the 'Frame would shield us, so we welcomed your machines

We depended on technology to wash our poisoned nations clean

I can't deny, it's true what you're saying  
I will beware not to make the same mistakes  
'Coz after all, we are all that's remaining  
Planet Y is alive!

Planet Y is alive, our race will survive!

Forever we're free and forever we'll be and forever we will dream

Planet Y is alive, our people will thrive!

Forever's our goal and forever's our soul and forever we will grow

Forever free

We can start all over, raise an empire of our own

We can build a new community and never stand alone

Now we are connected and working as a team

We have a chance to turn a new page, devoid of science and machines

We have the power, to design the perfect future

Utopia, in the silence of the sea

No glowing screens, no heartless computers

Planet Y is alive!

I see her shine, faintly in the distance

Our new sun... reminding me of home

Conjuring up, all we will be missing

Planet Y is alive!

Planet Y is alive, our race will survive!

Forever we're free and forever we'll be and forever we will dream

Planet Y is alive, our people will thrive!

Forever's our goal and forever's our soul and forever we'll grow and forever we'll flow into the deep

We will thrive, we'll survive, we're alive
