

Black Lucia

Aztec Camera

People say that all I do
Is talk about you
But that's not true
I talk about you
Think about you
Dream about you
Can't live without you
It's just not true.
I can almost feel the sunshine
When black lucia led the white parade
Let me always be the one who's left behind
When they desert you.

She's not your blue eyed girl
No diamond calling
She's a darkened sky
A crystal light
When the day runs dry
And the rain is falling
Black lucia led me into night.

I never thought that I could ever be the same
Until I met you
I thought my time had been arranged
Times have changed
Since you came
I miss you
I can almost feel the sunshine
When black lucia led the white parade
Let me always be the one who's left behind
When they desert you.

She's not your blue eyed girl
No diamond calling
She's a darkened sky
A crystal light
When the day runs dry
And rain is falling
Black lucia lead me into night.
