Black Lucia

People say that all I do
Is talk about you
But that's not true
I talk about you
Think about you
Dream about you
Can't live without you
It's just not true.
I can almost feel the sunshine
When black lucia led the white parade
Let me always be the one who's left behind
When they desert you.

She's not your blue eyed girl No diamond calling She's a darkened sky A crystal light When the day runs dry And the rain is falling Black lucia led me into night.

I never thought that I could ever be the same Until I met you I thought my time had been arranged Times have changed Since you came I miss you I can almost feel the sunshine When black lucia led the white parade Let me always be the one who's left behind When they desert you.

She's not your blue eyed girl No diamond calling She's a darkened sky A crystal light When the day runs dry And rain is falling Black lucia lead me into night.
