## **More Than A Law**

**Aztec Camera** 

I've seen that recipe Lawmen and royalty And nothing on earth can take that taste And make it something sweet I saw the news today A broken everything with years to pay And nobody else can save us now And that's alright by me 'Cos I say

We make love in theface of it all Feel the freedom and the purity And what we need is not security Something more than a law We walk at night in a blind wind Through the streets where the rich once lived And what we want's beyond the will to win Something more than a law

I feel the rain on me I'm soaked in memory And never will I betray that love 'Cos that's not love by me I know prosperity But he could never be a part of me The snow and the stone Feeling never at home Well she's my poetry 'Cos I say

And when we're lonely It's more than lonely So we turn around to say something bigger than us But then who do you blame when your love is gone?
