

## Back and Forth

B.o.B

Oh yeah  
Oh yeah  
That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night

Ooh, what you're doing there  
I love how you move it there  
Looking mighty good yeah  
Nothing to it, but to do it yeah  
Looking just right  
Keep doing all the things I like  
So girl let you hair down  
On the floor with your hands in the air now

And we, and we, and we don't care  
We don't care at all  
And we don't care  
We don't care at all

We knew this was something all along  
We don't care  
We don't care at all

That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night

Yeah  
Promise you will never leave  
A better man you will never see  
I love what you're telling me  
In the morning right here is where you better be  
Don't let go  
Buckle up, green light, let's go  
So girl let your hair down  
On the floor with your hands in the air now

And we, and we, and we don't care  
We don't care at all  
And we don't care  
We don't care at all

We knew this was something all along  
We don't care  
We don't care at all

That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night

We gon' dip, then glide  
Go ahead, back it up  
Then we go left, then right  
One step to the front  
Now do the electric slide  
Don't spill what's in your cup  
And if you feel alright  
Then gon' put your hands up

And we, and we, and we don't care  
We don't care at all  
And we don't care  
We don't care at all

We knew this was something all along  
We don't care  
We don't care at all

That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night

That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night  
That's right, we back and forth all night  
You know we back and forth all night
