

Confucius

B.o.B

You got that Confucius
You know what you're doing
And I can't get you out of my head
Cause girl you so far ahead
The way you using your head, head
You got that Confucius
You know what you're doing
And I can't get you out of my head
Cause girl you so far ahead
The way you using your head, head

I'll be here to catch you when you fall
Throw that cat like a catapult
You fall when it go down Lord knows
I sign my name before I lick the envelope

She told me keep my head high, cause now is my time
And if I lose sight, just use my third eye
She said my head high, cause now is my time
And if I lose sight, just use my third eye

You got that Confucius
You know what you're doing
And I can't get you out of my head
Cause girl you so far ahead
The way you using your head, head

I can feel your lips all around
It's like I took the words from your mouth
I take you from the bed to the ground
And when I elevate it goes down

She told me keep my head high, cause now is my time
And if I lose sight, just use my third eye
She said my head high, cause now is my time
And if I lose sight, just use my third eye

You got that Confucius
You know what you're doing
And I can't get you out of my head
Cause girl you so far ahead
The way you using your head, head
You got that Confucius
You know what you're doing
And I can't get you out of my head
Cause girl you so far ahead
The way you using your head, head
