

We Got The Power

B3

Stop for a moment
Here's a message to you
It's a call to us all
The things we must do

Got the cause for our vision
Got the force on our side
When the sky is the limit
When we go for the ride

Refrian:

Nothing can stop us
When we stand as one
When we come together
And we take on
We got it we got it we got it now
We got the power get ready to go
We stand united the energy flows
We got the power our moment has come
Nothing can stop us
When we stand as one

Stop let me tell you
Got to back on track
It's a call to us all
There's no turnin' back

I don't care what you've been doing
I don't care where you belong
From now on we're together
Cause together we're strong

Refrain:

Nothing can stop us
When we stand as one
When we come together
And we take on
We got it we got it we got it now
We got the power get ready to go
We stand united the energy flows
We got the power our moment has come
Nothing can stop us
When we stand as one

We got the power get ready to go
We stand united the energy flows
We got the power our moment has come
Nothing can stop us
When we stand as one

We got the power get ready to go
We stand united the energy flows
We got the power our moment has come
Nothing can stop us
We got it we got it we got it now

We got the power get ready to go

We stand united the energy flows
We got the power our moment has come
Nothing can stop us
When we stand as one

We got the power get ready to go
We stand united the energy flows
We got the power
