

# All I Know

Babybird

All I know is all you know and all you know is all I know  
For all you know it's all I know for all I know it's all you know.  
There's nothing left between us,  
Nothing left between, there's nothing left between us  
and nothing in between.  
Come back come back come back come back.  
My little heart is not alone,  
under a card you made your home.  
Now all I hear's your pretty voice silent on the telephone.  
There's nothing in my brain  
There's nothing in your heart  
There's nothing left to stop us  
Nothing left to start

Come back come back come back come back  
We've decided not to speak, decided not to hear,  
decided not to fall apart to wait another year,  
but theres nothing left between us.  
Nothing left between, there's nothing left between us  
and nothing in between.

There's nothing left between us  
There's nothing left between  
There's nothing left between us  
and nothing in between  
Come back come back  
There's nothing left between us  
nothing left between  
There's nothing left between us  
nothing in between  
There's nothing left between us  
There's nothing left between  
There's nothing left between us  
and nothing in between.

Come back come back  
Come back come back

All I know is all you know and all you know is all I know  
For all you know it's all I know for all I know it's all you know  
With nothing left between us  
Nothing left between  
Theres nothing in beween us  
and nothing in between.  
With nothing left between us  
and nothing in between.  
There's nothing left between us  
and nothing inbetween.

Come back come back  
Come back come back
