One Dead Groove

Take a look at the sky Take a look at the ground Take a look ahead You'll hear the sound Take a look at the ground The way your feet don't move Spinning like car wheels In one dead Groove

In one dead groove

Take a look at your eyes Like the holes in the ground Uncover your face Till you hear the sound Somewhere you shouldn't be before your ears got wings Things you never want to hear So high the air stings

In one dead groove You can get so high From one dead groove You can touch the sky

In one dead groove

Babybird
