Evergreen

Backstreet Boys

I've been on the run Slept under the sun Feeding off the clouds and eating Them like ice cream I've been all around Never left this town Blisters on my eyelids like it's Spring in paris I've seen everything, I've dreamt Every dream I am every human Oh I'm not even finished Look how I go Impeccable flow Wind in my face it hardly ever Rains Always on top I'm coming up I'm everything and I am everything I know it all don't know a thing I am changing, still the same I'm every color I'm every color I am evergreen I've been on the side Always stayed ahead I'm so very fast give me a Speeding ticket Me you cannot teach I just wanna know I've been tryin to stand but I Will never grow I've seen everything, I've dreamt Every dream I am every human No I'm not even finished Look how I go Impeccable flow Wind in my face it hardly ever Rains Always on top I'm coming up I'm everything and I am everything I know it all don't know a thing I am changing, still the same I'm every color I'm every color I am evergreen

The truth is stranger than fiction When you're a walking contradiction When you're evergreen You're always looking in You're the first one left But you're back again Don't be afraid to ask

But don't ask again We'll forever last when you're Evergreen Look how I go Impeccable flow Wind in my face it hardly ever Rains Always on top I'm coming up I'm everything and I am everything I know it all don't know a thing I am changing, still the same I'm every color, I'm every color I'm every color I'm every color (color) I am evergreen Yea I am evergreen I am evergreen I am evergreen
