

Little Girl

Bad Boys Blue

Where will you go tonight?
What makes you feel all right?
When you know
Your love one's gone away
You're going astray
You know there's a place to hide
A light in the darkest night
Going through
If you want me too
I'll be there for you
I'll be there for you

My little girl
Changed in the world
Walking through a land of dreams
She had never seen before
My little girl
Shine like a pearl
Won't you be down your knees
But I will show you how to fly
I see it in your eyes

All through deserted streets
A call from a heart that beats
Just as now
I had her all and gone
And the going has just begun
You, you can feel the pain
Clouds cry at every rain
Like you do
If you want me too
I'll be there for you
I'll be there for you

My little girl
Changed in the world
Walking through a land of dreams
She had never seen before
My little girl
Shine like a pearl
Won't you be down your knees
But I will show you how to fly
I see it in your eyes
