

Think About You

Bad Boys Blue

I close my eyes and see you standing there alone in the dark
Your hair is flowing gently in the wind
I know that you keep missing me as much as I miss you
Though we are apart, just apart

Your smile is what I need
Your touch is what I feel
Your love - the only thing that's true
Think about you

There was a time when we walked hand in hand
Together as one
We shared the hidden fortunes of our dreams
We walked through seasons in the sun
That warmed us tenderly
Forever in love, you and me

Your smile is what I need
Your touch is what I feel
Your love - the only thing that's true
Think about you

It's a cold and lonely winter of despair and I saw the tears
Just slowly running down your face like rain
The winds of change blow through your hair
And made me feel so sad - we almost lost all we had

Your smile is what I need
Your touch is what I feel
Your love - the only thing that's true
Think about you

Tomorrow is not just another day
'Cause I will be back
Back in your arms, back in your life again
And I will give up everything to feel your tenderness
Forever with you home at last

Your smile is what I need
Your touch is what I feel
Your love - the only thing that's true
Think about you
