You know i met him in the church down the kings street He said i've lost I find no peace I'm fifty two So I thought about the way that I am growing Then we sang a song I never understood Cause there's a freeze out Bringing everyone down To the ground from Whera you never get up Come oh summer come oh now Stay all winter with me Come oh summer come oh now Stay all winter You are dreaming nine to five no education Across the street they study hard it's just the same How does it feel tonight When all the footsteps that you dream to leave only makes you a fraid There's a freeze out Draining everyone's dreams No one ever Will get a second chance Come oh summer come oh now Stay all winter with me Come oh summer come oh now Stay all winter (searching)
