

# Loving You Out Loud

**Bad Company**

If I kissed you when you least expect it  
And take you in my arms, just accept it  
If I tell you you're what my life's about  
I'm only loving you out loud

When I call you up on the telephone  
And tell you that I'm feeling oh so alone  
I wanna love you dear inside out(?)  
I'm only loving you out loud

The times that we spent together  
Are the best that I've ever known  
No matter what the future may bring, baby  
It's loving you from now on, oh baby

If I kissed you when you least expect it  
And take you in my arms, just accept it  
If I tell you you're what my life's about, yeah  
I'm only loving you out loud

You know I'm only loving you out loud
