

# What About You

Bad Company

There's something about you that I can't let go  
Your spell is unbroken and it hurts to know  
And I can feel you, and I can touch you, your memories surround  
me

What about you, little darling, what about you

Living without you is a long hard climb  
And just when I'm over it, I see a friend of mine  
He said he saw you, and how he's sure you, you'd like us still  
together

What about you, little darling, what about you  
What about you, little darling, what about you

They said that we were dreamers, chasing some illusion  
Something came between us, and broke it all in two

I can feel you, I can touch you, I want us back together

So what about you, little darling, what about you  
What about you, little darling, what about you  
What about, what about you babe, tell me, what about you  
Don't go, I'm tellin' you baby  
What about you babe, oh baby...
