If I'm There

Bad Omens

There are scars that never ever show themselves
You get when you're left alone too long in hell
They tried to keep in the secrets that you wouldn't tell
But they just stripped you for parts you had to sell

Well if I'm there to catch you when you fall
You'll have a friend down in hell after all
And if you're there to catch me when I fall
Then maybe hell ain't so bad after all

I didn't want to believe how much you needed help
And I just left you to be all by yourself
And now I wish I had seen that you weren't doing well
But I just came back to see how hard you fell

Well if I'm there to catch you when you fall
You'll have a friend down in hell after all
And if you're there to catch me when I fall
Then maybe hell ain't so bad after all

Build me up or tear me down
I will never make a sound
Build me up or tear me down
Run a dagger through my chest
I believe it's for the best
Build me up or tear me down

There are scars that never ever show themselves
You get when you're left alone too long in hell
They tried to keep in the secrets that you wouldn't tell
But they just stripped you for parts you had to sell

And if you're there to catch me when I fall
Then maybe hell ain't so bad after all

Build me up or tear me down
I will never make a sound
Build me up or tear me down
Run a dagger through my chest
I believe it's for the best
Build me up or tear me down

Well if I'm there to catch you when you fall
You'll have a friend down in hell after all
And if you're there to catch me when I fall
Then maybe hell ain't so bad after all

Well if I'm there to catch you when you fall
You'll have a friend down in hell after all
And if you're there to catch me when I fall
Then maybe hell ain't so bad after all
