Running in Circles

Bad Omens

The distance to heaven is measured in gold
So if you stop along the way
Make sure that you save it when you sell your soul
So you can afford to stay
All we want is something to keep us
From the things we're afraid to know
But what we need is something to free us
From the fear that we can't let go

Running in circles and I can't think straight
Running in circles and I can't escape

Well we're gonna live forever
And I've never felt so sure
Everything has always been
What we're looking for
Yeah we're gonna live forever
'Cause we ain't afraid no more
Everything has always been
What we're looking for

The only way out of this hell is through
So run and keep running fast
'Cause if you slow down it'll ruin you
So keep running and never look back

You're not alone
You may be just like me
Without a home
Lost and looking for something
But not alone
And if you're wondering
You're not alone
Yeah

Well we're gonna live forever
And I've never felt so sure
Everything has always been
What we're looking for
Yeah we're gonna live forever
'Cause we ain't afraid no more
Everything has always been
What we're looking for

Running in circles and I can't think straight
Running in circles and I can't escape
Running in circles and I can't think straight
Running in circles and I can't escape

Well we're gonna live forever
And I've never felt so sure
Everything has always been
What we're looking for
Yeah we're gonna live forever
'Cause we ain't afraid no more
Everything has always been
What we're looking for

```
Running in circles and I can't think straight
Running in circles and I can't escape
Running in circles and I can't think straight
Running in circles and I can't escape

Running in circles and I can't think straight
Running in circles and I can't escape
Running in circles and I can't think straight
Running in circles and I can't escape
```
