

## Sowing the Seeds of Utopia

Bad Religion

We all know politicians only go  
Just half-way there  
Just half-way there  
The innocence of youth needs protection not abuse  
But no one seems to care  
Yet no one seems to care  
And you sit there adn watch the world go around  
From your pseudo-benevolent vantage point  
While we who've been left to pick up after you  
Try our best to make some sense for those who  
Come next  
Now what have you done to foster the truth  
Besides just hide hide the lies?  
Besides just hide hide the lies?  
A selfish campaign never justifies the gain  
But the means are verified  
Yeah the means are verified  
And you sit there and insist you are right  
From your popular psychological podium  
While those who rely and depend on you  
They wilt because you don't accept we need  
Each other  
Whule sowing the seeds of Utopia,  
You invoked a convenient amnesia  
You forgot how to care, you forgot how to provide,  
You forgot how to work toward a meaningful life
