

## Watch it Die

Bad Religion

I was born on planet earth  
the rotating ball where man comes first  
it's been around for a long, long time  
but now it's time to watch it die

I saw a man on my big blue screen  
he ruled the world economy  
he said the rich would never concede  
but some day soon he'll be put to sleep

I've seen the life of the forest green  
and adaptations of the deep blue seas  
and who knows who is the fittest  
they will all soon be put to rest

On a plunging flight and we're sitting  
in the pilots seat in the midst of life  
people on a dark horizon praying  
somebody will save their lives

I was born on planet earth  
at a drastic time full of plastic mirth  
and everyday I've seen increasing signs  
and you would too if you'd opened your eyes  
you had a chance you did not try  
so now it's time to watch it die
