

# I Miss You

**Badfinger**

Though you've been gone for just a week  
It makes me feel so sad to speak  
Lady come back  
I miss you

And though before I didn't cry  
Now my eyes are never dry  
And a thousand jesters couldn't make me smile

I miss you  
I miss you

And now I know that I was wrong  
But it's too late, for now you've gone  
Lady come back  
I miss you

And though our times were good and bad  
Now you're gone, I'm always sad  
And a thousand jesters couldn't make me smile

I miss you  
I miss you

I miss you.
