

# Dancing With The Moon

**Balkan Beat Box**

Don't know where we're going  
But I know I saw in your eyes  
My life growing  
To unite with u

And the time is towing us to age  
And tossing years  
But we're still glowing  
Like we never knew

We took a decision  
To have no definition  
And our ammunition  
Is to keep our love true

We chose to share a vision  
More then we envisioned  
While this song is playing  
I want to dance with u

So put on that record that we use to listen to  
When we found the truth  
A golden soft memory in blue  
To repaint it, in me and in u

I'm dancing in your garden  
To ease up all that's harden  
Plant a seed this morning  
To see a flower bloom

Words need not be spoken  
Sleeping souls have woken  
And this song is not more then  
A blooming after noon

For there is no other  
For me u are the mother  
A perfect sound of ever  
In a perfect tune

As night slowly approaching  
The sun is set for love  
And when I see u smiling  
I'm dancing with the moon
