

# War Again

Balkan Beat Box

Here we are like we're going to get war again  
Coming hard, come and get a gun, join the gang  
With the bang bang and the same song we sang  
Coming over and over again

It's peaking up now, getting more like a game  
And it feels real like we learn to fake the fame  
And there's never more than one truth  
But u can always tell your better half

Always tell your better half of the story  
It goes well with the better side of your face u show on TV  
Give me a good reason why I shouldn't start a revolution  
What's in the constitution? Is this illusion that we buy?  
U cut the wings and then u say fly  
U say the hero is the one that died  
But the true hero is the one who doesn't live a lie and understands  
That there's an end out of the cycle  
Who's the master? Who's the disciple?  
U can do what u can, but will u do it again?  
So what's the plan?  
Looks like we are going to get war again

Here we are like we're going to get war again  
Coming hard, come and get a gun, join the gang

With the bang bang and the same song we sang  
Coming over and over again

It's peaking up now, getting more like a game  
And it feels real like we learn to fake the fame  
And there's never more than one truth  
But u can always tell your better half

Look out  
Going to get war again, going to get wrong again  
Gone again, with the same song again, on again  
Can't be born again, who's gone again?  
Who's going to gain out of this war again?  
Hooligan in a tie rule again  
Soon again u will see it all begin again  
Sink again, and that will make u think again

And when they call u go  
When they are wrong u know  
And u will fallow, and u will swallow  
Again like long ago the bomb will blow  
So sit back relax and enjoy the show  
Cuz' u are as cold as snow and I am here below  
I'm going to speak out, scream out  
Here we go, got the fresh flow  
So before it's over  
Then u are going to find a different kind of war to start again

Going to get war again
