Give Me Hope

Bambix

You accuse me of so many things that I can't account for
You try to interfere in my life
By giving me the thought that I must living down on earth
And you up in the sky

I am gay, I am black
I've got aids, I've got a hunchback
And I'm unemployed
But we never did anything wrong
Never bothered or hurt anyone
So why should you care

You accuse me of so many things that I can't account for
You try to interfere in my life
By giving me the thought that one day I'll end up in hell
And you in heaven
My father happened to be a jew
I guess that makes me a jew too
But I don't even believe
Still people judge me for that name
But a name is just a name
And it's the person that counts.
