

A dinosaurs dying-out took ten million years.
A mammals revolution is coming to an end, sudden end.
Blackbird picks a worm, thousands killed by desert storm.
Rolling over species, space seed in my heart.
When you think of me, I live in Bavaria
Does it really matter, do I really care? I care
`cause that`s the way the cookie crumbles
When you think of me, I study biology
Does it really matter, do I really care? I care
`cause that`s the way the cookie crumbles
And he finally got himself down in the streets hard to remember
Is this blood on my hands?
God let me remember! Where have I been?
What did I do? God let me remember!
