

## Another Time

**Bang**

Another time, another place  
Another day, another race  
I can tell you how It really feels  
You don't have to be the only one  
When I'm standing right here

Another time, another space  
Another look, from another face  
I can tell you how It really feels  
You don't have to be the only one  
When I'm standing right here  
You don't have to be the lonely one  
You just need to be here

In the morning when the sun comes up  
In the evening when the sun goes down  
In the hours we search all day,  
For a better way

Let me tell you how it really feels  
You don't have to be the only one  
When I'm standing right here  
You don't have to be the lonely one  
You just need to be here
