

I Choose You

Barcelona

A pretty girl in a white dress
And a ring of gold
Everything I wrote down
It's time for me to let you know

I'll be standing right here
When we're all alone
Give me your shaking hands
I won't let go

If I make you angry
If you get sick
And the world goes crazy
I can promise you this

I got a whole lot of love to live
And I need you to always be a part of it
I (I) choose you

I wanna wake up to you every day
And I promise that I'll never keep my heart away
I (I) choose you

I'll be the one to call you
I'll protect your dreams
As I build this family
I'm gonna want you so close to me

When you're old and you break down
When it hurts too much
When you can't stand up
I will pick you up

If I make you angry
If you get sick
And the world goes crazy
I can promise you this

I got a whole lot of love to live
And I need you to always be a part of it
I (I) choose you

I wanna wake up to you every day
And I promise that I'll never keep my heart away
I (I) choose you

I know what I said to you
I'm never gonna break it
And when you're distant
I'll be patient
I will never turn you
When our days are through
I choose you

If I make you angry
If you get sick
And the world goes crazy

I can promise you this

I got a whole lot of love to live
And I need you to always be a part of it
I (I) choose you

I wanna wake up to you every day
And I promise that I'll never keep my heart away
I (I) choose you

I (I) choose you
I (I) choose you
I (I) choose you
I (I) choose you...
