

Time to Mend

Barcelona

lock down and close it fast
you're done with the day, done with the day
don't speak so i won't laugh
i know what you'll say
i hear what you say
please be my love, please hold me love

you keep it all choked up
it can't get away, can't get away
details impressive dove
it's full of decay, it's full of decay

give it space my love, give it time my love
oh oh listen hear me. i won't be too far honest, trust me, i've
been you before

this world is all turned around
we're caught in this place, stalled in this place
don't let it kill you now
we're not here to stay, we're not here to stay
well close your eyes my love and let it rise my love

oh oh listen and hear me 'cause i won't be too far.
honest, trust me, 'cause i've been you before

it's not the end, 'cause you still have time to mend
it's not the end, 'cause you still have time
