

# Watching Me

Barcelona

She could tell it was on my face,  
that I knew it was up to me.  
She never dreamed of second place,  
and she thought we fit perfectly.  
She said, "Why you running so fast?  
Slow down for me."  
I said, "Why don't you stay back in the past?  
Just let me be."

Chorus:

I can see that she's watching me,  
did she mean to be here? I don't wanna know.  
With every tear running down her face, was it all a waste?  
Said, I don't wanna know.  
And every time I think that, I realize that,  
we were never meant to be.  
I can see that she's watching me, do I need to be here?  
I don't think so.

Do you remember closing that door,  
did you turn off all the lights?  
You start to question more and more,  
and your ghost will haunt you through the night  
She said, why you standing in the dark?  
Do you see me?  
I said, How did we make it so far?  
Just let me be.

Chorus:

I can see that she's watching me, did she mean to be here?  
I don't wanna know.  
With every tear running down her face, was it all a waste?  
Said, I don't wanna know.  
Every time I think that, I realize that,  
we were never meant to be.  
I can see that she's watching me, do I need to be here?  
I don't think so.

I'm so tired, I won't apologize for what I can't erase.  
So don't keep coming around just to kick my heart in my face.

Chorus:

I can see that she's watching me, did she mean to be here?  
I don't wanna know.  
With every tear running down her face, was it all a waste?  
Said, I don't wanna know.  
Every time I think that, I realize that,  
we were never meant to be.  
I can see that she's watching me, do I need to be here?  
I don't think so.
