I Saw It

Barenaked Ladies

I saw I saw it We all did It hurt I heard it We all hid You took what we all hide We all hide from The hooks went right inside That's where they hung In the park By the playground I won't let you down In the park By the playground I won't let you You weighed and waited You kept steady You'd count, and recount it Now you're ready You took what we all hide We all hide from The hooks went right inside Then the feeling numbs I won't let you down In the park By the playground From this point on I won't let you down You say you deserve it I won't stand and observe it From this point on We won't allow this, brother If we don't end this now There'll be others I won't let you down In the park By the playground From this point on I won't let you down In the park By the playground From this point on I won't let you down In the park By the playground From this point on I won't let you down In the park By the playground

From this point on I won't let you down In the park By the playground From this point on I won't let you down In the park By the playground From this point on I won't let you down In the park By the playground From this point on
