## Serendipity

## **Barenaked Ladies**

So long ago, on a summer day I put my best shirt on I took you to the matinee With money from mowing lawns Money from mowing lawns

You worked down at the Dairy Queen We hit it off from the start Now there's a blizzard in between Frost inside a heart

If I had a good reason, I would share It with you Then the coldest season came Making room for something new Good for you Good for me Call it serendipity

Walking on coals, just trying to get through But summers don't last that long All that is left here is the truth Everything else is gone

Gone without a good reason for me to share With you When the coldest season came Making room for something new Good for you Good for me Call it serendipity

If I could only hit my stride I'll make it to the other side I don't wanna be roadkill When there's half a cup to fill To fill

Good for you (Call it serendipity) Good for me (Serendipity) Call it serendipity Call it serendipity Call it serendipity

Walking on coals, just trying to get through Now summers don't last so long All that is left here is the truth Everything else is gone
