I've Never Been in Love Before

Barry Manilow

Well I've neva been so low on love & I know I neva hurt so bad I neva tried so hard just to see it fall apart Just to lose the sweetest love I eva had

Well I've neva been so low on love & I know I'll neva be the same I know you meant to stay so if I drove you away Oh I know that I'm the only one to blame

They say that every day, should make me stronger & one day I won't think of you at all But every day you're gone the days get longer & all I do is wait for you to call

Well I've neva been so low on love & I know that as the years go by I'll still be lovin' you When I'm holding someone new & when I think about the tears You made me cry, I know you neva really cared enough & I've neva been so low on love
