

# This Love

Barry White

I'm talking about this love  
I'm talking about this love

This love will take us  
To the top of every mountain, yeah  
And find a pathway through the sky  
And lead us to the path alone

This love, I'm talking about this love  
This love, I'm talking about this love

This love will open up the door  
Straight in to heaven, yeah  
And if you want the heaven that we know  
The heaven that we'll all get to go

This love, I'm talking about this love  
This love, I'm talking about this love

This loving that we've got  
Is something good to sing about  
This love and there's no denying  
I got a love that's flying high as the sky

And all this loving that we feel  
Is something that is really real, it's love  
And there's no denying, I feel merry  
Good and high as the sky

This love, I'm talking about this love  
This love, I'm talking about this love

This love, I'm talking about this love  
I'm talking about this love  
I'm talking about this love

This loving that we've got  
Is mighty good and nice and hot  
This love, yeah and there's no denying  
I got a love that is flying high as the sky

This love, I'm talking about this love  
I'm talking about this love  
I'm talking about this love

This love, I'm talking about this love  
I'm talking about this love  
I'm talking about this love
