

Breathe

Bars and Melody

Tears run from cheek to sleeve
Blame me but you choose to leave
Still texting me 143
Three words you breathe

I close my eyes
See your beauty in my mind
Can't describe how I feel inside
I won't stop I pray
I wish the pain would go away
I can't pretend
Is the end
Are we friends?
Can we mend it for us?
So it's up to you

I can't breathe
These words I can't speak
Because I've never been in love
You're my first
I'm feeling empty inside
My eyes blurry I can't survive
Without you
I know you're cautious and scared
What we gonna do?
Our hearts never broken before
But you're so unsure
And I promise I won't let us fall
We're good together
Please don't throw it away
I won't say you gotta say

Tears run from cheek to sleeve
Blame me but you choose to leave
Still texting me 143
Three words you breathe
So it's up to you
So it's up to you
So it's up to you
To breathe
Those words
Just breathe
Ooh
Just Breathe
Just breathe

You're my one and only
I don't wanna let you go
Just breathe, don't cry
You are so beautiful
Don't be afraid I will be with you through it all
I will be the hand to catch you if you fall
I see you happily, the two of us together
No matter how hard they try to tear us apart
They can't
Never want us to be happy at all
... united forever

It's your call.

Tears run from cheek to sleeve
Blame me but you choose to leave
Still texting me 143
Three words you breathe
So it's up to you
So it's up to you
So it's up to you
To breathe
So it's up to you
So it's up to you
So it's up to you
To breathe
Those words
Just breathe

You're the one
I love you
I miss you
I miss you girl

Why don't we spend a little time together?
We both know this could last forever
Since day one you stole my heart
It's like hell every time we're apart

So it's up to you
So it's up to you
So it's up to you
To breathe
Those words

Tears run from cheek to sleeve
Blame me but you choose to leave
Still texting me 143
Three words you breathe
So it's up to you
So it's up to you
So it's up to you
To breathe
Those words

143
ILY
Just breathe
