

# Don't Look Back

## Bars and Melody

You know the name top of the game  
So other kids are saying that we're lame  
Well we're back, back again  
Back with the rhyme and pad and a pen  
But the time BGT was only written us off  
Next work of dough you know it's alot  
We kept smiling we stayed strong  
Now look where we are we're taking you by storm

Flood warning coming in like a tsunami  
Reving up his engine just like a begani  
Better wake up cause he's living subalaming  
You can't even hate cause you know we're kinda charming  
Ha ha that's how we do  
You love me and I love you  
Going full speed we're coming through  
Climbing to the top and we love the view

No one ever believed in us  
And no everybody makes a fuss  
If they only knew what's coming  
They would've stuck by us  
If you knew what we would be  
Maybe you would've followed me  
But it's too late now  
Don't look back it's your mistake to see

Me im b to the a-r-s  
Don't gotta prove nothing no go to my neck  
Music is the way I wanna make my name known  
Like Avril V and Ricky cos they got so  
Warning warning bambinos swarming to the front of the stage  
Please move back  
Screaming my name they know my name  
And we ain't even started the track

Straight out of the jungle and we ain't sane  
Always on track, but in our own lane  
Our love for you is growing by the day  
Love you more than all the stars in the milkyway-ay

No one ever believed in us  
And no everybody makes a fuss  
If they only knew what's coming  
They would've stuck by us  
If you knew what we would be  
Maybe you would've followed me  
But it's too late now  
Don't look back it's your mistake to see

Roll up, stand up here for one time  
Keeping it tight like Calvin Klien  
When my heads down I'm writing rhymes  
Cos everybody knows that I blow your mind (blaw)  
Stepping on the stage you know what it's about  
We on a journey on a bumpy route  
If you don't join in then just bail out

I know what you're missing and it's the end of the drought

Keeping it original we're pen to pad  
If you dunno what I'm on about then ask your dad  
Just like sesasani we don't talk jazz  
But we're coming with the flow that will drive you mad  
Hold up - let's take this down a notch  
When we're in town make sure you watch  
It'll be crazy to miss our show  
Coz you gon't hear about it every single place you go

No one ever believed in us  
And no everybody makes a fuss  
If they only knew what's coming  
They would've stuck by us  
If you knew what we would be  
Maybe you would've followed me  
But it's too late now  
Don't look back it's your mistake to see

No one ever believed in us  
And no everybody makes a fuss  
If they only knew what's coming  
They would've stuck by us  
If you knew what we would be  
Maybe you would've followed me  
But it's too late now  
Don't look back it's your mistake to see
