

Everybody's On The Move

Basia

Tell me where you're going
'cause here you never felt at home
Is it thirst that drives you
Is it love you're looking for
Is it desperation
There must be more to life than this
Not now but one day you'll discover
One special place that you came from

It's not good enough
The grass is greener over there
Go after your wandering star

Everybody's on the move

Many different reasons
Make people leave it all behind
Some look for excitement
Others take risks to survive
Let's forget the cynics
Doubting the motives of us all
Nobody knows what you desire
No one but you knows what it feels right

If they send us back
We will get there anyway
To try for a better life

Everybody's on the move
