

Run For Cover

Basia

How well I know this feeling
Seems that you will never learn
It can't go on forever

But very soon the tide will turn

When it won't go away
And no one else can cover you
I'll shelter you from thunder

Run for cover, got to run for cover
When danger is around
Run for cover, got to run for cover
I'll never let you down down down

If you play with fire
You're gonna get your fingers burned
Now the stakes are higher
Remember what it was we learned

When it won't go away
And no one else can cover you
I'll shelter you from thunder

Run for cover, got to run for cover
I'll always be around
Run for cover, got to run for cover
When the sky is falling down down down

Everyday I'm getting stronger
On a wave of hope that's going round
There's another world inside my heart
It's not impossible to turn it inside out

When it won't go away
And no one else can cover you
I'll shelter you from thunder

Run for cover, got to run for cover
When danger is around
Run for cover, got to run for cover
I'll never let you down down down

Run for cover, got to run for cover
I'll always be around
Run for cover, got to run for cover
When the sky is falling down down down
