

## Run For Cover

Basia

How well I know this feeling  
Seems that you will never learn  
It can't go on forever

But very soon the tide will turn

When it won't go away  
And no one else can cover you  
I'll shelter you from thunder

Run for cover, got to run for cover  
When danger is around  
Run for cover, got to run for cover  
I'll never let you down down down

If you play with fire  
You're gonna get your fingers burned  
Now the stakes are higher  
Remember what it was we learned

When it won't go away  
And no one else can cover you  
I'll shelter you from thunder

Run for cover, got to run for cover  
I'll always be around  
Run for cover, got to run for cover  
When the sky is falling down down down

Everyday I'm getting stronger  
On a wave of hope that's going round  
There's another world inside my heart  
It's not impossible to turn it inside out

When it won't go away  
And no one else can cover you  
I'll shelter you from thunder

Run for cover, got to run for cover  
When danger is around  
Run for cover, got to run for cover  
I'll never let you down down down

Run for cover, got to run for cover  
I'll always be around  
Run for cover, got to run for cover  
When the sky is falling down down down
