

Two Islands

Basia

When you're feeling lost and lonely
And when people treat you coldly
Close your eyes - you're right there

when you think there's nothing up there
When a doubt becomes a nightmare
Close your eyes - you're right there

you can escape this place
You can forget this place
Anywhere's better, kinder, brighter
Two islands
Two islands
They'll take you to their hearts
My islands

nowhere so peaceful
Nowhere as blissful
I will always remember my two islands with love
They will never grow old

when your week is made of Mondays
When your road is going sideways
Close your eyes - you're right there

when you swim against the current
And your arms are getting tired
Close your eyes - you're right there

you can escape this place
You can forget this place
Anywhere's better, kinder, brighter
Two islands, two islands
They wait for me
I know my islands

nowhere so peaceful
Nowhere as blissful
I will always remember my two islands with love
They will never grow old

they came to us for a reason
Leaving memories we can lean on
Close your eyes - you're right there

one day if I go to heaven
We will be again together
Far away from here
My two islands wait for me
