

Crash & Burn

Basshunter

When I was a little cosmic pink
Like a fire burning with the drink
Gravity was going to pull me down
But I was faster than the speed of sound

Look at me I'm a superstar
I will never let you fear the dark
We're gonna burn for a million years
So come out, now the coast is clear

I will take you on a ride
We will never crash & burn
Be like stars up in the sky
We will never crash & burn

I will take you on a ride
We will never crash & burn
Be like stars up in the sky
We will never crash & burn

So come on!
So come on!
We will never crash & burn
We will never crash & burn
We will never crash & burn

I want to take you through the milkyway
To a place where there's no night and day
You can feel it getting closer now
Time is moving, let me show you how

Look at me I'm a superstar
I will never let you fear the dark
We're gonna burn for a million years
So come out, now the coast is clear

We are the ones, we are the light
We take control, we take the fight
If you believe you own the night
You own the night (night night...)

I will take you on a ride
We will never crash & burn
Be like stars up in the sky
We will never crash & burn

I will take you on a ride
We will never crash & burn
Be like stars up in the sky
We will never crash & burn

So come on!
So come on!
We will never crash & burn
We will never crash & burn
We will never, we will never, we will never crash & burn
