

## Amazons From Outer Space

Batmobile

Walkin down the street late one night  
It came from up above it was a big red light  
It went so fast I couldn't believe my eyes  
It was a UFO that came up from the sky  
Four green women as nice as they could be  
Walked out of the saucer and they waved hello at me  
They giggled and they growled it was a sight to behold  
But I could guess the story that they told

They were amazons from outer space  
Took me in their saucer was a real gone place  
Four green women in a UFO  
They took me in and growled 'Well we need you so'  
They came from a planet where no man has ever been  
As they saw me walking it was the best they've ever seen  
They took me in their saucer and they treated me real good  
As I learned to speak their language it was quickly understood
