Animal In Man

Battalion of Saints

The animals that run the world Will make sure that we all die The animal that's inside man It's lurking deep inside me I try to wonder why It has to be like this Look around can't you see The animals in the street People walking all around Trying to steal your space The animal that's in man Will kill you if it can The jungle you made around yourself The concrete mountains that surrounds you and chokes you Sometimes I feel so trapped No place to run and hide Being stalked by other men Who think they're better than I What makes them so good Or way above me I'm just a human being Who just wants to be treated right

[Chorus]

If you want to be god
Look where it got him
Hanging upon a cross
Only man could do such things
Kill over someones land
You'll have to stop and think
Since we're next in line Man will be extinct
Man will be extinct Man will be extinct
Man will be extinct Man will be extinct
Man will have to survive Man will have to survive
