

# God of War

## Battle Beast

Behold the living God  
A power inhumane  
The burning of the blood  
I'm the venom in your veins

A savior sent to earth  
The one to bring the pain  
Into a grand rebirth  
From armageddon's flames

Glory for eternities  
To claim the throne  
Kingdom of a thousand years  
We stand alone  
Offer me your sacrifice  
There's no scape  
Fall into my arms again  
Into my cold embrace

Raise your hand to hail your king  
While the world is crumbling  
See the flags rise and fall  
For the God of war

All united for the cause  
Land of glory waits for us  
Cities burn, worlds will fall  
For the God of war

Those who would resist  
Are hammered into dust  
Unleash the hounds of hell  
To rule at any cost

Ash returns to ash  
Lucifer rise again  
A beast I'm growing strong  
With every life I claim

I will sooth your deepest fears  
I'll feed your brain  
Drown 'em in a sea of tears  
And screams of pain  
Face the cruelest mastery  
Confess to me  
Final truth will set you free  
And a slave eternally

Raise your hand to hail your king  
While the world is crumbling  
See the flags rise and fall  
For the God of war

All united for the cause  
Land of glory waits for us  
Cities burn, worlds will fall  
For the God of war

God of war!
