Wrong Side Of Town

BBM

You've heard it said, I taught the bird to fly One kiss from me and some can't say goodbye The place you'll find me when the sun goes down After hours, on the wrong side of town

How many faces will I change today?

Take them to places where the shadows play

That's where you'll find me when the sun goes down

After hours, on the wrong side of town

Lulled by the promise of a broken dream
They all come looking for the answers
The question's never if and when they fall from grace
After all, it's just a matter of time

Here comes another with a life to spare So young and innocent, but I know that stare Just whistle Parker's mood and I'll be there After hours, on the wrong side of town

After hours, on the wrong side of town Stay away from the wrong side of town
