She's Everything

If you let me be a part of you If you tell me what I gotta do Maybe I could change I don't wanna see another day If I ever let you walk away from the love we have

And here I can't see why I need her close to me She's everything Everything that I ever wanted here Woh she's everything And I don't wanna make believe

Never needed anyone before Never knew you could give me more than I ever had I don't wanna be afraid again You're the one that saves me when I'm falling from you

And here I can't see why I need her close to me She's everything Everything that I ever wanted here Woh she's everything And I don't wanna make believe

I'll never be what you make me Take me now Trying to find if there's a way to make you mine

She's everything Everything that I ever wanted here Woh she's everything And I don't wanna make believe She's everything
