

Perfect Picture

Bea Miller

I can't believe that I ended up here
I can't believe, I can't believe that
Just when I thought that the road was so clear
Had no idea, had no idea

You'd come right out of nowhere
Spin me around
How did you make my world come crashing down

Tonight, you made my perfect picture look like black and white
I know I've never seen my colors so alive
With you around, I know that we're gonna be fine
Tonight, you made my perfect picture come to life

We always think that we know what we want
That's where we go, but where we going?
We always think we have it all figured out
But all we know, we know is nothing
One thing can make it all change
So hold on tight, hold on tight
One thing can make it all change
In just one night, I don't know why

You'd come right out of nowhere
Spin me around
How did you make my world come crashing down

Tonight, you made my perfect picture look like black and white
I know I've never seen my colors so alive
With you around, I know that we're gonna be fine
Tonight, you made my perfect picture come to life, life, life
You made my perfect picture come to life, life
And I don't know why

You came right out of nowhere
Spin me around
How did you make my world come crashing down?

Tonight, you made my perfect picture look like black and white
I know I've never seen my colors so alive
With you around, I know that we're gonna be fine
Tonight, you made my perfect picture come to life
Tonight, you made my perfect picture come to life
Tonight, you made my perfect picture come to life
