

# That Same Song

Beach Boys

Well back in time with just a rhythm and rhyme  
Gregorian chants were a real big thing  
They took that chant and added harmony  
It was a different sound  
But had the same meaning

I know (I know) I know (I know)  
It took us a long while  
To go (to go) to go (to go)  
And find us a rock style  
I know (I know) I know (I know)  
That we can take it one more mile

Because  
We're singing that same song  
We're still singing that same song  
We're singing that same song  
That same song  
That same song

The rock of ages  
Built that rockin' sound  
'Til more and more people start to come around  
They worshipped in church  
And built that great big choir  
It grew and it grew  
Until it spread like fire

I know (I know) I know (I know)  
It took us a long while  
To go (to go) to go (to go)  
And find us a rock style  
I know (I know) I know (I know)  
That we can take it one more mile

Because  
We're singing that same song  
We're still singing that same song  
We're singing that same song  
That same song  
That same song

Same song  
Oh yeah  
Same song  
Oh yeah  
Same song that same song

Same song  
Oh yeah  
Same song  
Oh yeah  
Same song that same song
