

Out In The Way

Beach Fossils

Are you waking me up now?
I was smiling headfirst 'gainst the wind
It was in you that I could work around

So free
Then just keeps reminding me
All of these moments quickly passing me

In the darkness passing through
Tell me is it really you?
You don't look the same as when I was dreaming
Even though it's not much time
I can't get it off my mind
Everything feels different now here without you

Even though it's not much time
I can't get it off my mind
Everything feels different now here without you

Out in the way
Out in the way
It was in you that I could work around
